Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner informed Mr. Arno that the after-final amendment of 2/22/05 would not be entered as limitations directed to selecting conformations of a ligand are a new issue requiring further search and consideration. The examiner stated, however, that the amendment would overcome the new matter rejection. In addition, the examiner indicated that the proposed amendment probably would not be free of the prior art, and offered to send a reference discovered in a previous search for the applicant's consideration, in view of possible filing of an RCE and new amendment. Mr. Arno indicated that he would like to review the reference. .
